

Update Series Part Two Emails Guide

I made these audios before I made the ones in my “Update About Case” emails.

At the time I made the audios included in this series of emails, I was under the impression that Wells Fargo had probably just admitted everything to you. I thought that you knew that every allegation I make describes something that did in fact happen. I thought that they had prejudiced you or attempted to prejudice you, with the healthcare records they illegally obtained from the hospital I was in at age 18 (I still believe that this has occurred. I do not know to what extent they have admitted to other crimes. I also explain, in these audios, those records to the best of my ability, and recommend that you play my explanation to a psychologist with the appropriate specialty. I found one online in your area).

The above should give you some background into why I say certain things.

The file checklist is on the next page. I recommend you open the pdfs as they are brought up in the audios.

P.S., in the other “Update on Case” emails I sent you, it is actually not best to skip ahead in the Shirley call analysis. I have too much to keep up with and gave faulty info.

For this series of emails, you should have the following files (39 total)
